XECONTROL

— 01

PERFORMANCE MAXIMISED

The new eControl: Series X²
is the ultimate low voltage control system allowing
integration over a number of external devices.
Feature rich and pushing the boundaries.

02 —

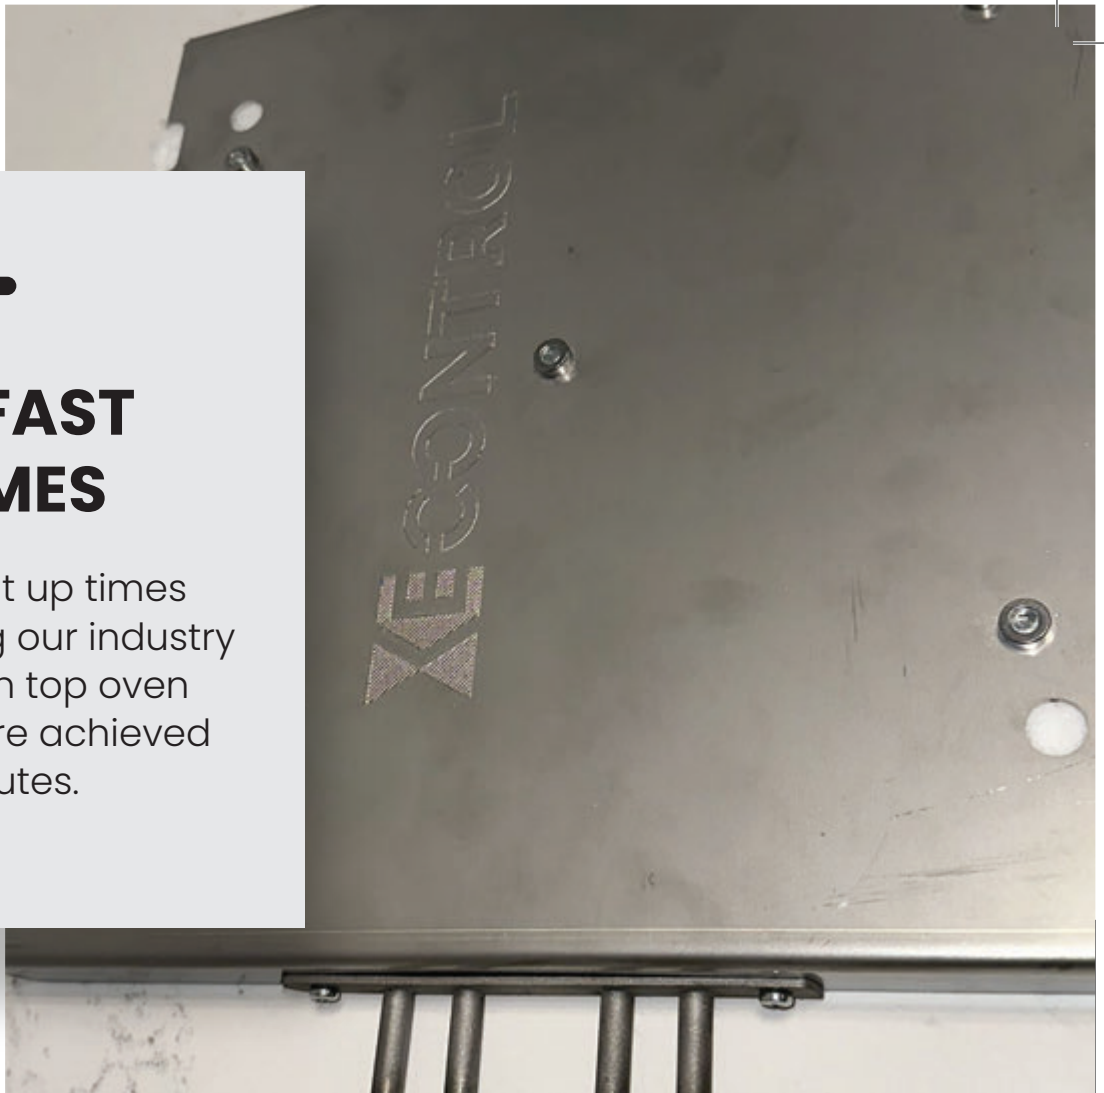

INTERACTIVE SMART CONTROL PANEL

The new Series X² system is the new high performance control system from eControl. The system can be used in a simplistic intuitive manner or set to provide a fully remote and automated experience.

03 —

LIGHTNING FAST HEAT-UP TIMES

Series X² boasts heat up times faster than anything our industry has seen before with top oven roasting temperature achieved in as little as 38 minutes.

VERSATILITY

INNOVATION

— 04

REMOTE CONTROL HANDSET

Upgrade to a multi-channel bluetooth handset with touch screen control allowing the customer to remote control each area of the appliance at will.

www.econtrolsystem.co.uk

05 —

WALL MOUNTED TOUCH SCREEN

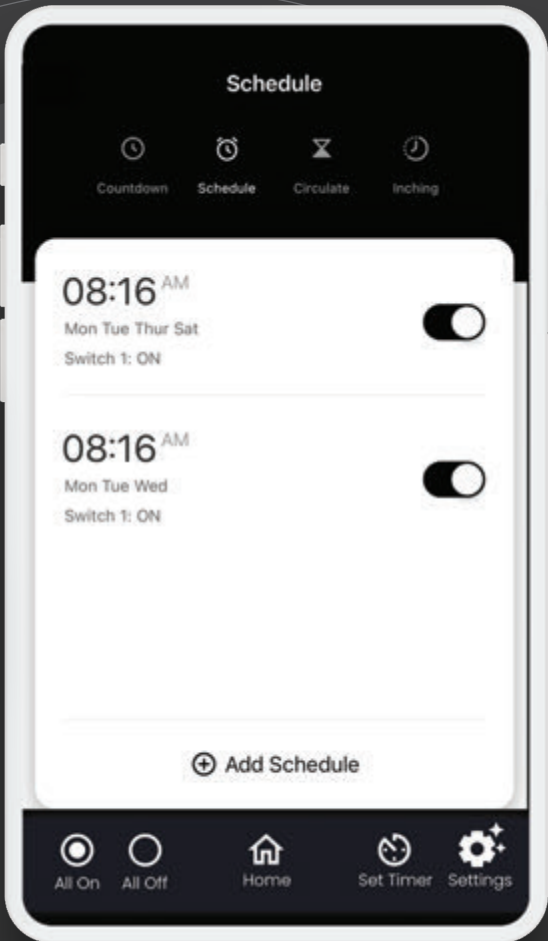

Series X2 comes with a multi-channel glass touch control switch as standard, which can be cupboard or wall mounted. This allows the user to select which area of the appliance is on or off at any one time.

06 —

SERIES X² CONSUMER APP

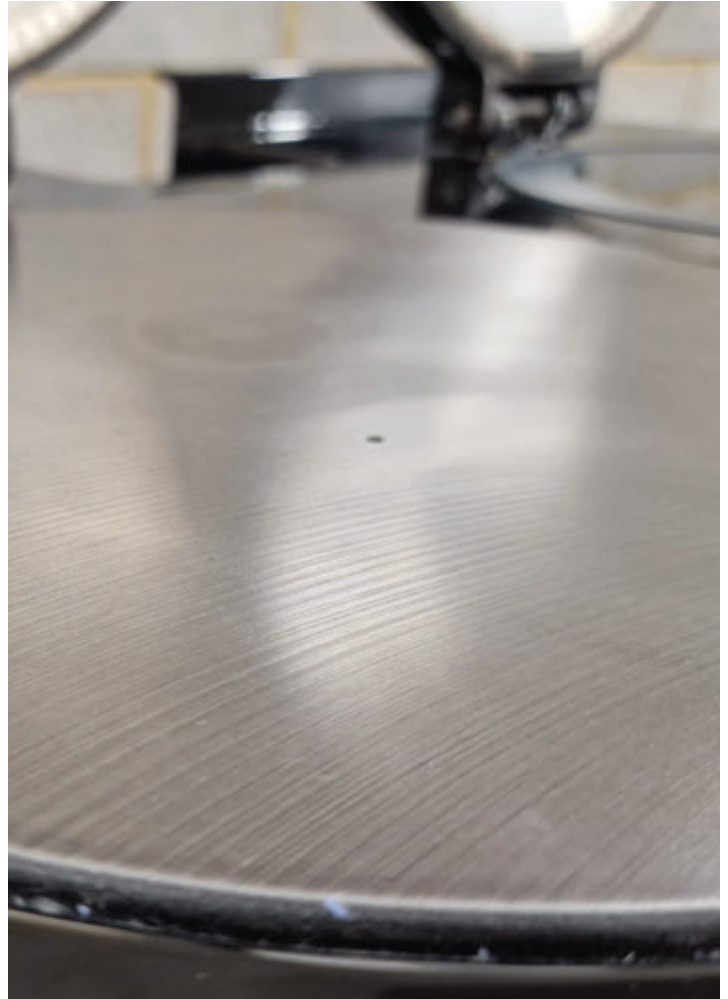

Upgrade to the proprietary Series X2 consumer app. This allows the user to independently select which combination of hobs and ovens are on, plus the ability to set timers in each respective area.

07 —

FULL SIZE CAST IRON HOBS WITH ECONTROL SMARTTECH

Our new embedded hobs made from UK cast iron are the ultimate heat storage hobs.

08 —

INDUCTAHEAT

The all new Series X² induction hob is available as an optional upgrade for customers who are looking for instant heat.

09 —

TWIN INSTAHEAT

Series X2 twin ceramic hob compatible with 4 oven models for ultimate convenience.

10 —

INSTAHEAT

Our ever popular Instaheat Hob with new branded glass will continue. Upgrade customers to this option for instant heat up times on hobs.

11 —

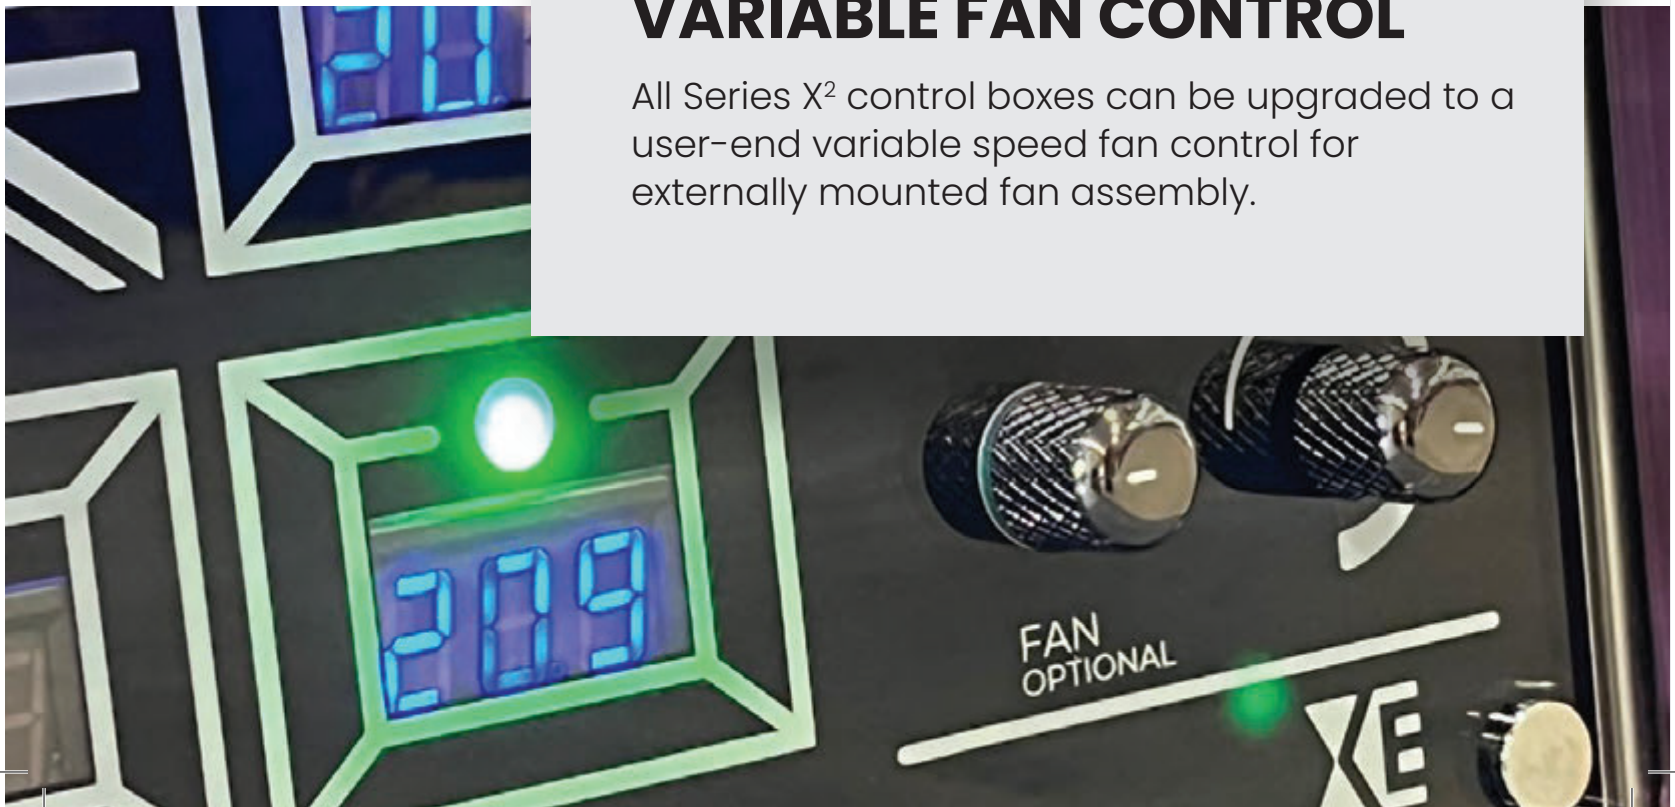

GRILL BOOST BUTTON

The new twin element Series X² grill has a dedicated push switch with a 15-minute timer. This innovative feature gives performance unseen in the industry to date.

12 —

VARIABLE FAN CONTROL

All Series X² control boxes can be upgraded to a user-end variable speed fan control for externally mounted fan assembly.
